Food Policy 2020-2023

Approved by Governors Spring 2020

Turn your ear to wisdom and apply your heart to understanding (Proverbs 2:2)

Broadwater is a Christian School. We will enable children to become wise, confident, successful learners with the motivation, skills and responsibility to make a positive difference in God's world. Our vision is underpinned by the values we live by.

The Holy Spirit produces this kind of fruit in our lives: love, joy, peace, patience, kindness, goodness, faithfulness, gentleness, and self-control. There is no law against these things! Galatians 5:22

It is this fruit that, in partnership with parents, we will instil in the children of our school.

Food Policy

Aims for Food Policy

- To ensure that we are giving consistent messages about food and health
- To give our pupils the information they need to make healthy choices
- To promote health awareness
- To contribute to the healthy physical development of all members of our school community

Organisation

We are a healthy school. It is important that we consider all elements of our work to ensure that we promote health awareness in all members of the school community. We can provide a valuable role model to pupils and their families with regard to food and healthy eating patterns.

Through effective leadership, the school ethos and the curriculum, all school staff can bring together all elements of the school day to create an environment, which supports a healthy lifestyle.

Snacks

All Foundation Stage and KSI classes take part in the Government initiative to provide all infants with free fruit and vegetables during the day.

KS2 children bring a healthy snack of fruit or vegetables which they eat at playtime – no other snack is allowed during break. It is recognised that as children grow, they may require a more substantial snack. In this instance an additional sandwich is an appropriate option.

Packed lunches

A hot school meal is provided by the local authority contracted caterer. This is provided free for all children in Early Years, Years 1 and 2. When children in these years are on a school trip, a packed lunch will be provided. Lunches can be booked for children in Years 3 to 6 online. Where children bring a packed lunch to school, we do not allow sweets, chocolate bars (although we do allow chocolate covered biscuits at present), fizzy drinks or nut-based products (due to pupils with severe nut allergies).

Water for all

Water is freely available throughout the school day to all members of the school community. All class sinks have drinking water. Every child is encouraged to have a secure bottle to store their water in. Children may drink their water at any time except during the 15-minute assembly or during whole class teacher input at the beginning of lessons. Regular water and brain breaks are built into the school day and curriculum by class teachers. All children are also reminded to drink water at their snack time.

Food across the Curriculum

There are a number of opportunities for pupils to develop knowledge and understanding of health, including healthy eating patterns and practical skills that are needed to understand where food comes from such as shopping, preparing and cooking food.

English provides children with the opportunity to explore poetry, persuasion, argument and narrative work using food and food related issues as a stimulus, e.g. writing to a company to persuade them to use healthy alternatives etc.

Mathematics can offer the possibility of understanding nutrition labelling, calculating quantities for recipes, weighing and measuring ingredients.

Science provides an opportunity to learn about the types of food available, their nutritional composition, digestion and the function of different nutrients in contributing to health and how the body responds to exercise.

RE provides the opportunity to discuss the role of certain foods in the major religions of the world. Children experience different foods associated with religious festivals.

Computing can afford pupils the opportunity to research food issues using the internet and other electronic resources. Pupils design packaging and adverts to promote healthy food choices.

Food Technology as part of Design Technology provides the opportunity to learn about where food comes from and apply healthy eating messages through practical work with food, including preparation and cooking.

Relationships and Health Education encourages young people to take responsibility for their own health and well-being, teaches them how to develop a healthy lifestyle and addresses issues such as body image. Pupils are able to discuss issues of interest to young people, e.g. advertising and sustainable development.

Geography provides a focus on the natural world and changing environment, offering the chance to consider the impact our consumer choices have on people across the world that rely on growing food as their source of income. History provides insight into changes in diet and food over time.

Physical Education provides pupils with the opportunity to develop physically and to understand the practical impact of sport, exercise and other physical activity such as dance and walking.

School visits provide pupils with activities to enhance their physical development e.g. to activity centres.

Out of hours learning has included study skills activities based around food and nutrition and food-based art activities. (Get Set Go club)

Partnership with parents and carers

The partnership of home and school is critical in shaping how children and young people behave, particularly where health is concerned. Each must reinforce the other and our school is well placed to lead by example.

Parents and carers are regularly updated on our water and packed lunch policies through school newsletters. We ask parents not to send in fizzy drinks and we remind them that only water may be drunk during the school day, except at lunch when children may drink juice or squash.
